

Mount Washington Cog Railway

Restoration of Track

Overview

The Summit Circle

Proposed Restoration

Purpose of Restoration

Construction and Schedule

Summit Photos

The Summit Circle

- Tract A and B owned by State of New Hampshire
- Tract C is owned by Railway in fee from base to Summit of Mount Washington
- Tract D is owned by Railway in fee
 - Railway has a right to pass over
 Tracts A and B by pedestrian and vehicular means to get to Tract D

- Tract A is subject to a rightof-way ("ROW) in favor of the Railway
 - ROW is 99 feet wide and is reduced to 50 feet wide near where Summit House existed in 1962 to its terminus

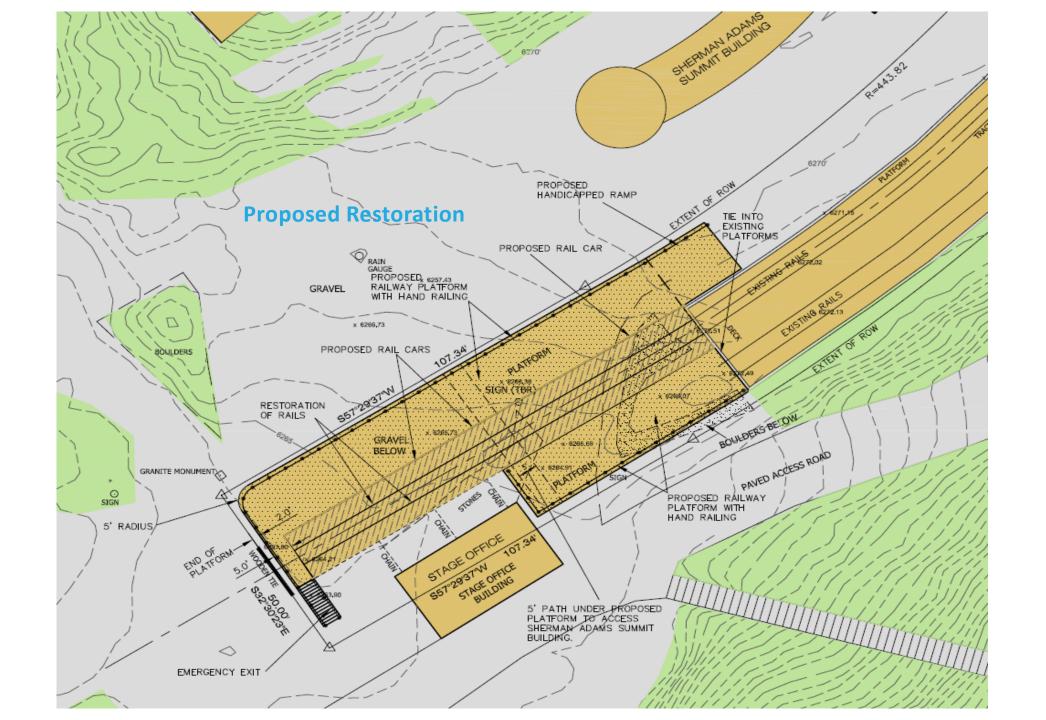

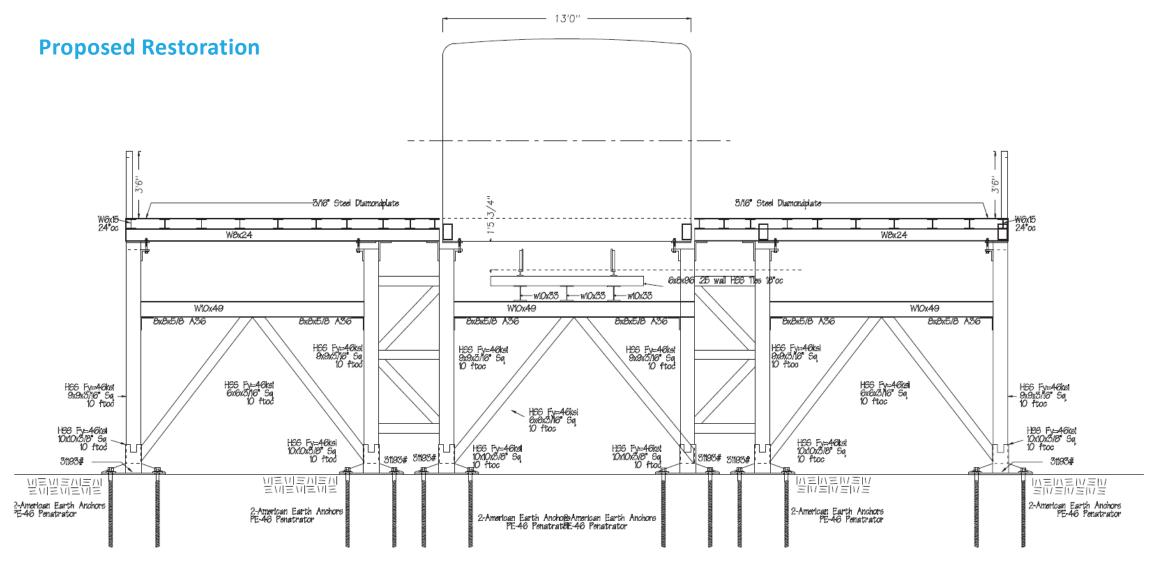

Proposed Restoration

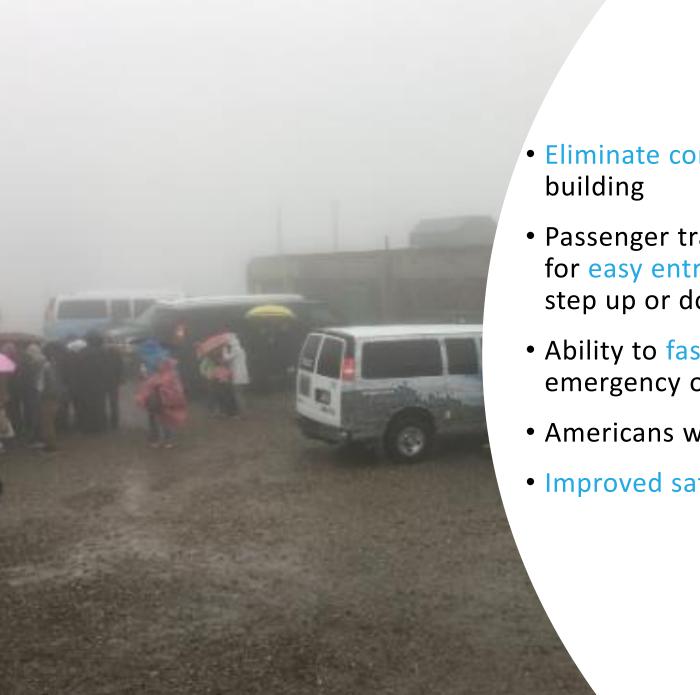

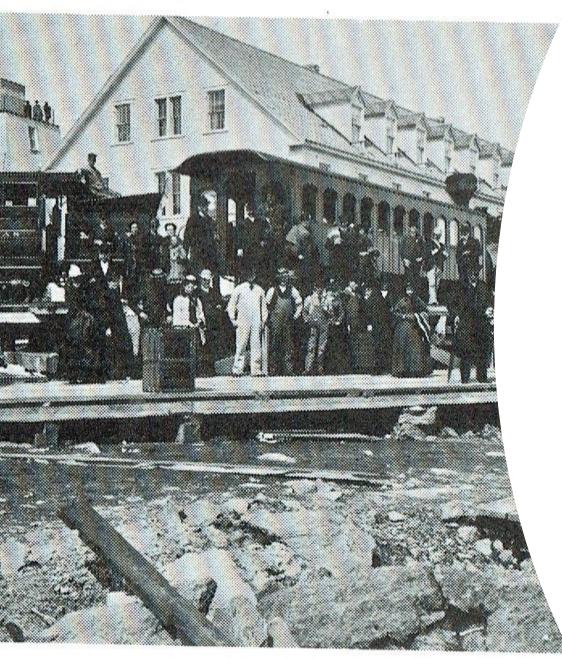

Purpose of Restoration

- Eliminate congestion in front of Sherman Adams building
- Passenger train floor and platform will be level to allow for easy entrance/exit for passengers without having to step up or down when entering or departing train
- Ability to fasten train to trestle/platform in the event of emergency or weather event
- Americans with Disabilities Act (ADA) compliant
- Improved safety of loading and unloading of passengers

Construction and Schedule

- Constructed of steel
- Securely fasted using earth anchors
- Designed to support trains and passengers
- Constructed to withstand wind speeds up to 230 mph
- Manufactured in advance offsite of summit
- Components will be transported to summit via work flat
- Assembly will take place at summit
- Construction will be complete by June 1, 2020

Summit Photos

SUMMIT HOUSE, MOUNT WASHINGTON.—This hotel is a long, plain, three-story structure of wood, solidly bound down to the ledges, and adequate to the accommodation of one hundred and fifty guests. Two steam-heated stories are for sleeping-rooms, and no guest can control the steam in his room, which is continually circulating through the entire heating system. The lowest story contains parlors, a large dining-room, the hotel office, containing also a telegraph and post office, a bric-a-brac counter, and in the center a great, generously-filled coal stove, which usually draws within its influence most of the visitors to the summit.
